LUH ACADEMY

**We invite you to a
behind the scenes tour
of our hospital and the
services we provide.**

Sign up at 541-271-6336

Academy Tour Schedule

The tour begins with a free continental breakfast.

We start the morning with Academy participants meeting with Ryan Fowler (hospital administrator), Lori Groves (chief finance officer) and one of our medical providers during a continental breakfast.

Learn about hospital operations and our billing process. Participants are encouraged to ask questions or make suggestions at this time or at the end of the tour.

The next stop on the tour is the ambulance bay — where you will be invited into one of our fully-equipped ambulances for an up-close view of the equipment that is used to help stabilize patients on their way to the Emergency Department (ED).

Next stop is the ambulance bay.

The LUH EMS district covers 650 square miles; including 24 miles of dunes.

Our chief nursing officer, Tara Blohm tours us through the **Emergency Department (ED) and Acute Care**. In the ED, you will learn about the type of cases we see as a Level IV Trauma Center.

In Acute Care, you will visit a patient room, and learn about medication dispensing. Meet some of our caring staff who care for patients with acute and chronic illnesses, as well as those with surgical needs.

We have 10 private rooms and five semi-private. Our Swing Bed Program transitions Medicare patients who require additional in-house therapy after their hospital stay.

After a short break, visit with our **Surgery** staff who will discuss the procedures available right here close to home. No need to travel outside of the area.

Surgical specialties include ear-nose-throat, general, gynecology, orthopedics, podiatry, and uro-gynecology. Our staff has over 129+ years of combined experience and our surgeons are Board Certified in their field.

Surgical Services

Next, we visit the **Laboratory**. We provide a diverse range of testing services to hospital patients and physician offices in the community, including state-of-the-art testing in Chemistry, Coagulation, Hematology, Blood Banking, and Serology.

Our testing personnel are certified Medical Technologists and Medical Technicians. Our experienced phlebotomists are skilled at difficult draws. We are a CLIA accredited facility.

Radiology: The tour of Radiology is always a favorite. From X-rays to ultrasound pictures of developing babies; from nuclear medicine to CT; it's amazing what can be done in this small facility. We have state-of-the-art equipment and can provide your out-of-the-area providers with digital images without you having to travel; saving you time and money.

Our technologists are nationally registered through the American Registry of Radiologic Technologists (AART) and licensed through the Oregon Board of Medical Imaging (OBMI). Our mammography program is certified through the American College of Radiology (ACR). Combined, our techs have over 100 years of experience.

Physical Therapy, Occupational Therapy, and Speech Therapy: Voted Favorite Physical Therapy on Best of the South Coast 2019

We have a full-service therapy team which offers rehabilitation in a variety of environments including: outpatient, inpatient, swing bed and long term care. We see all ages from pediatric to geriatric and can provide therapy for a large array of issues including areas of advance study; such as sports medicine, vestibular treatments, Kinesiotaping, Graston, and Lymphedema.

Congratulations! We celebrate your Academy Tour graduation with a delicious lunch prepared by our culinary trained Chef.

Graduation Lunch

You have another opportunity to ask questions and make suggestions to our Administrative Team. Representatives from the Auxiliary and Foundation will be on hand to talk about their organizations.
